MODERN COLLEGE WEBSITE WITH CHATBOT
PROJECT

Introduction

- ▶ This project focuses on building a modern college website with chatbot support for student queries.

Problem Statement

- ▶ Students face difficulty in accessing complete college information like fees, admission, and placements.

Objectives

- ▶ • Build an informative website
- ▶ • Add chatbot support
- ▶ • Improve user experience
- ▶ • Provide quick access to data

Scope of Project

- ▶ Covers academic info, admissions, placements, and chatbot-based interaction.

Methodology

- ▶ • Frontend: HTML, CSS, JS
- ▶ • Backend: Node.js
- ▶ • Chatbot: Rule-based system

System Architecture

- ▶ User → Website UI → Backend Server → Chatbot Response

Features

- ▶ • College Info
- ▶ • Chatbot
- ▶ • Gallery
- ▶ • Placement Data
- ▶ • Contact Form

Placement Statistics

Placement %

Technology Used

- ▶ HTML, CSS, JavaScript, Node.js, Express

Implementation

- Developed responsive UI and integrated chatbot API.

Results

- ▶ • Easy access to info
- ▶ • Improved engagement
- ▶ • Fast responses via chatbot

Advantages

- ▶ • User-friendly
- ▶ • Time-saving
- ▶ • Interactive system

Limitations

- ▶ • Basic chatbot
- ▶ • No database integration

Future Scope

- ▶ • AI chatbot
- ▶ • Database integration
- ▶ • Online admission system

Conclusion

- ▶ The project successfully delivers a smart college website improving accessibility and user interaction.
